NOTICE TO MARINERS 053/2024

Swing Bridge Abutment – Working Platform

Mariners are advised that work is required to be carried out on the swing bridge bearing plates at the west (London Road) side bridge abutments.

So that the work can be carried out safely a temporary working platform will be positioned on the abutment.

The working platform will be approximately 1m in width therefore narrowing the distance to the swing bridge central turret very slightly.

The platform will be painted orange and adequately lit at night. In addition the edges will have reflective warning tape.

Due to the required positioning of the platform, the platform may be partially submerged during the highest spring tides. Poles will be erect on the corners with reflective tape to indicate the extremities of the platform should it become completely submerged.

The below photo is an example of the intended platform.

This notice will self cancel on completion of the works.
